Saturday, December 10, 1904.

Mrs. Chadwick's career shows that, after all, bankers are human.

Perhaps Prof. Hyatt is saving his snow to give it to us as a Christmas present.

It appears to be wise to have a good, strong safe, and keep your money somewhere else.

Stockmen propose to form a big combination, but are they sure that the packers will like it?

Nan Patterson naturally feels sure of acquittal, having an elderly jury and a good-looking face.

Cracksmen who find nothing valuable in a safe, have a poor opinion of people guilty of false pretenses.

This prolonged dry spell is at least advantageous in the way of promoting free and easy conversation.

Among those who have no reason to complain of the drought and dust, are the industrious disease germs.

A Chicago poet is printing rhymes "After Riley." Upon reading them, Riley ought to be after the poet.

May we not expect an early opening of the great annual discussion concerning the prospective scarcity of water?

Apostle Penrose has just returned from Mexico, but he can not remember that he saw any missing witnesses down there.

Will the Smoot members of the Legislature expedite the election of a Senator by voting all together with uplifted hands?

Gov.-elect Cutler will not be able to give every applicant an office, but he can furnish each a nice suit at a reduced figure.

Have some of the absent witnesses been thoughtful enough to provide families for themselves in the places to which they have retired?

Mr. Cutler can see, from the large number of applications for jobs, that many people sincerely desire to make his administration a success.

To relieve the suffering from cold of the Japanese outposts, the Siberian scouts are making it hot for them; but the little brown men are not a bit grateful.

In Denver a husband was granted divorce because his wife made him cook his own meals, it being considered cruel, doubtless, to cause him to eat such meals.

Speaking of the smelter smoke, it is a marvel to see how much it has abated since the election. There's nothing like a good, old-fashioned apostolic victory to clear the air.

Denver politicians sent to prison without right of bail can appeal to the United States Supreme Court with the assurance that their cases will be heard within a reasonable time after their terms have expired.

Crowds are reported to be pushing daily to see Nan Patterson. Both the crowds and Nan would doubtless feel more natural if they were admitted by ticket; and it would be a relief to the court.

The Deseret News has discovered all of a sudden that one of the American candidates for member of the Board of Education is not a sectarian, as it claimed he was before election. It is a pity that the church organ didn't find out its error not only as to him but as to all the American candidates, before election.

The examination to be held in this city for school-teachers for the Filipino youngsters ought to afford a career for some enterprising Utahns. This State

furnished some teachers on the first call, as it did some golders for the archipelago on the first call; and in each case they have given good accounts of themselves.

## NOT FOR THE FLESH-POTS.

Just as the fathers secured their recognition slowly from the other countries of the world, so the Americans of today in Utah are slowly and surely winning their way to public attention in the other States.

Coupled with the fact that relatively speaking the American party has increased by one-third of its former proportions in this city in the last thirty days, is the assurance that Eastern and Western people are beginning to take notice of our existence.

Strange to say, with these flashes of the dawn lighting up our sky, the arch-enemy of American progress here is busy circulating the foolish falsehood that The Tribune is about to change its politics, or that the American party is about to disband, or both.

Such stuff is tommyrot, just about worthy of the hypocritical sanctimoniousness that originates it and the Gentile sycophancy which (in some cases) circulates it.

The American party has a mission in this world; and it will be neither coerced nor frightened into any recession from the duty which it owes. Its prospects of early success have greatly increased since the November election. All of the evils which it was organized to fight have become more apparent to the public mind; while at the same time American citizens in larger and larger numbers, as the days pass by, are being convinced that no real politics exists in Utah, nor can exist, until the war by the American party for the social freedom of the people shall have been won.

Quit the fight! As well might Lincoln have ceased his struggle against disunion after Grant had begun his relentless career. As well might the fathers have gone back to a colonial dependency after Yorktown.

American party friends, we have broken their terrorized ranks; they are demoralized. Our party will dominate Utah and restore her political freedom. Then, and then only—with peace, prosperity and individual liberty achieved for this commonwealth—the American party may dissolve and its members may return to the ranks of their national organizations.

And as for The Tribune, the men who predict that it will desert the fight are themselves deserters. They only wish The Tribune would play the craven, as they know it will not. This paper had the largest circulation, the best advertising patronage, the most complete support of any Republican journal in the intermountain country. If it had chosen to be a craven, there was its opportunity, with nothing to lose and everything to gain in a selfish way. It claims no particular credit for choosing the nobler part; but it may justly assert the possession of a little common sense. As it turned from the fleshpots of the Smoot-ridden party in Utah, does any one suppose that it is false and foolish enough to return to them? None! The Tribune will remain the exponent of Americanism in this State until un-Americanisms shall have been driven from our community life; and when this danger to Utah has vanished, The Tribune will be its own announcer of its future policy.

Keep up the fight, Americans! It is the liberty of yourselves and the liberty of your children for which you are waging this war.

## MADHOUSE MANIPULATORS.

Of all the crazy finance that the country has ever seen this coup of the lawless Lawson has been the worst.

In an era of supposed common sense, business sanity and honesty, a man named Thomas W. Lawson of Boston began an attack upon what he called "Frenzied Finance." He used magazines and newspapers and personal letters to the public as they had never been used before; his avowed object was to demonstrate the dishonesty and the danger of the methods pursued by the Standard Oil magnates in dealing with public corporations and the interests of stockholders; he professed to show how Rogers and others of the Rockefeller group had taken from the innocent public, by brazen deceit and thieving manipulation of public corporations, hundreds of millions of money, the most of it coming from those who could poorly afford the loss and the most of it going to those who had no need of the increase.

And this man Lawson, under cover of the general notoriety, not to say reputation, which he had achieved for himself in his profession of regard for the honest investor, proceeded on Wednesday and Thursday of this week to utterly demoralize the stock market, beginning with certain large possessions of the Standard Oil crowd. In forty-eight hours he effected a shrinkage in market values of more than one hundred millions of dollars, and incidentally acquired a vast addition to the vast fortune which he was already reported to possess.

Whom did he injure? The men upon whom his attack had ostensibly been made? Not in the slightest degree. They probably shared with him in the profits. They are too wealthy and their financial support is too enormous for them to lose any of their stock holdings, no matter what may be the decrease in the market price. On the contrary they, like himself, probably rushed in to buy the holdings of others which had to be sacrificed in the panic. The real injury was to the man of relatively small investments; the man who had to borrow in the money market, giving his

stocks as security to the banks; the man who was carrying his interests on margin sufficient at normal times, but insufficient under the terrific onslaught of this crazy attack. These were subjected to cruel losses. He either had to make good by procuring other loans at extravagant rates of interest, or he had to see his stocks sold out at panic prices.

There should be some way to restrain by law the maniac or criminal career of a man like Lawson. He is not the only one, but he represents at the present hour the most advanced type of the man who, in the name of justice sought for the people, proceeds to wreck the people; and who, while affecting to warn against "Frenzied Finance," adds to that frenzy and turns a whole business community mad with fear and rage.

The proper place for such men as Lawson and some of those whom he attacks (if he tells the truth about them) is in a madhouse where they can play with stocks, up and down, as suits their devilish whims without injury to private investors or public welfare.

## CHURCH ORGAN ON DANGEROUS GROUND.

The evil effect of the inconceivable violence of the Deseret News toward the American party is beginning to appear. The church organ constantly and viciously insists, contrary to facts and the plain, straightforward declarations of the American party, that this is an anti-Mormon party. It held out to its readers all through the campaign that the Mormon church and the Mormon people were being assailed by the American party speakers, and by The Tribune. We constantly challenged it to produce a fact, a remark, a sentence, from any of the speeches of the campaign, or from any utterance of The Tribune to justify its allegations in this respect. It utterly failed to do so, for the very good reason that there was nothing of the sort to produce.

But while this campaign of malevolence, conducted on an utterly false basis, has had no effect at home, where the falsity of the News is known to all, and where its complete failure to produce any proof of its position is fully shown to every reader, it appears to have made an impression in the East. Thus, the Baltimore Sun, which commented on the phenomenal vote polled by the American party, refers to it as the "anti-Mormon" party. That is an idea, or an alternative expression, which the Baltimore paper could have obtained nowhere else than from the Deseret News. It is not possible to have derived it from any authorized expression of the American party, its leaders, exponents, or its organ.

Now, what will be the effect of that sort of work upon the situation here, and on the minds of the people of this country? It is inevitable that the eighty million people of the United States will sympathize with and support the American party and its principles. If those eighty million people are taught to consider that party the anti-Mormon party, they will still sympathize with it, and these eighty million people will inevitably range themselves as absolutely and distinctively anti-Mormon. Can the Mormon people view that sort of an outlook with any sort of satisfaction? Do they want that to be the situation; do they court the hostility of all their countrymen? If so, they have only to follow the lead of the News, to get it. That adviser has always led them into the bogs and quagmires of defeat and distress. If the News insists upon an anti-Mormon party here, that is what the country will understand we have. And then, as usual, its own people will be the sufferers, and if the evil course is persisted in, their ruin will be complete.

## A NEW SUGAR FACTORY.

The Tribune is exceedingly glad to note that the farmers and citizens generally of northern Sevier and southern Sanpete counties are taking effective steps to secure for their locality a well-equipped sugar factory. It has been amply demonstrated that the requisite factors for successful sugar-beet growing exist there in eminent degree. The soil is well adapted to it, there is plenty of water for the crop, it ripens well, and the railroad is convenient for transporting the beets to the factory.

It affords The Tribune especial gratification to note this movement for the success of the sugar factory in the location named, for the reason that for a number of years we have been advocating the project, pointing out the favorable conditions there and the advantages of such a plant. Sugar beets are a crop that the farmers can get good money out of, every year. Beets always bring a good price, and bring it in cash. The demand for them can never fail, because the sugar consumption of the country far outruns in increase the growth of the home production. Year by year we import increasing tonnage of sugar; the "sweet tooth" of the American people is never filled.

It is, then, a sure business proposition, especially in this great arid region, to put in a sugar factory in a well-selected site. The climatic and soil conditions of the mountain country surpass in general favorable average, all other parts of the United States for this industry. The beets are being brought up to a saccharine strength elsewhere not reached, the crops are brought to maturity at will, without being dependent upon uncontrollable storms or drought. The season for harvesting is unfailing in the good weather that can always be depended upon. It is therefore certain that those who put their money into this new sugar factory will find it a

good business investment, and we rejoice in the fact.

## PERMANENT PAYING.

One of the most important contributing elements in the success of Utah mines, as dividend payers, has been the patience and pluck of stockholders.

In the majority of instances the great paying properties of this State have been developed systematically, scientifically, in order to secure, by proper development, the largest possible tonnage and values at the least cost of operation. This method could only occur where the ruling spirits of the company were determined to make big and lasting mines rather than to get quick bread money, as it is called.

To this great fact we commend anew the attention of mining men. The glorious record of the State may be still more splendidly enhanced by the future, if the demand of stockholders for premature returns upon their investments can be subdued and if the management of the mines, being intelligent, can pursue such course of development as to assure safety of the property in paying dividends and perpetuity of its profit-making.

Many a good mine has been wrecked and is today dismantled because the money which should have gone into work has gone too quickly into the pockets of stockholders.

# The BACK WARNS YOU

A WEAK, A LAME, OR AN ACHING BACK IS NATURE'S WARNING THAT THE KIDNEYS ARE SICK.

Cure Them With Doan's Kidney Pills.

Backache and urinary troubles are danger signals sent to tell you that the kidneys are clogged and congested; that the system is rapidly filling up with uric acid and other poisonous waste that should be passed off in the urine.

Healthy kidneys filter out of the blood every day more than an ounce of poison. But when the kidneys are sick, this filtering process is either hindered or suspended. So the body can never be well when the kidneys are ill; and it is because so many people neglect sick kidneys that kidney diseases are causing more deaths than any other human ills.

It is easy to cure any form of kidney trouble with Doan's Kidney Pills before it reaches a fatal stage, and there are many symptoms to tell you when you have kidney disorders.

The most common of these symptoms are:

Pain in the small of the back, hips or sides; pain when stooping or lifting.

Headaches and dizzy spells.

Nervousness, languor.

Too copious or too scanty discharge of urine.

Thick, cloudy, discolored and ill-smelling urine, with deposits of sediment.

Having to get out of bed at night to pass urine, etc.

The blood carries the urinous waste to every part of the body. It gets into the nervous system and causes neuralgia or sciatica; it gets into the muscles and causes rheumatic pains and gout; it weakens the lungs and irritates the heart, causing the heart to flutter and palpitate; it crystallizes into gravel and stones in the bladder and kidneys.

You lapse into a general run-down and languid condition and drift every day towards diabetes and Bright's Disease.

You may have only one of the above symptoms, or you may have several, but danger lurks in every one, and you should begin treating the kidneys at once with Doan's Kidney Pills.

This great specific is composed of simple vegetable elements which are absorbed immediately by the kidneys and act on the kidneys alone. It heals and cures diseased tissues, allays inflammation and congestion, and restores normal kidney action.

I did not hope that the pills would have such effect upon the action of the kidneys, and stop the backache, but it is a positive fact that treatment did. I very emphatically endorse Doan's Kidney Pills.
